

\$50 Rebate

Prowler

Stealth Cam, leader in the category of digital and 35mm scouting cameras, releases its next generation of scouting cameras with its new PROWLER. This Dual lens camera truly becomes the ultimate scouting tool for the hunter looking to maximize his time in the field by monitoring deer activity 24 hours a day. With a 5 megapixel color day time image and a 2 megapixel night time image, the PROWLER will deliver extremely sharp, high-quality images in daylight or dark. The night time images captured by the PROWLER are made possible through the use of the 42 IR (infra red) emitters with an effective range of 3-50 feet.

Model STC-DVIR5

REBATE
